IP Centrex Telephone Systems

Reduce your overall operating costs

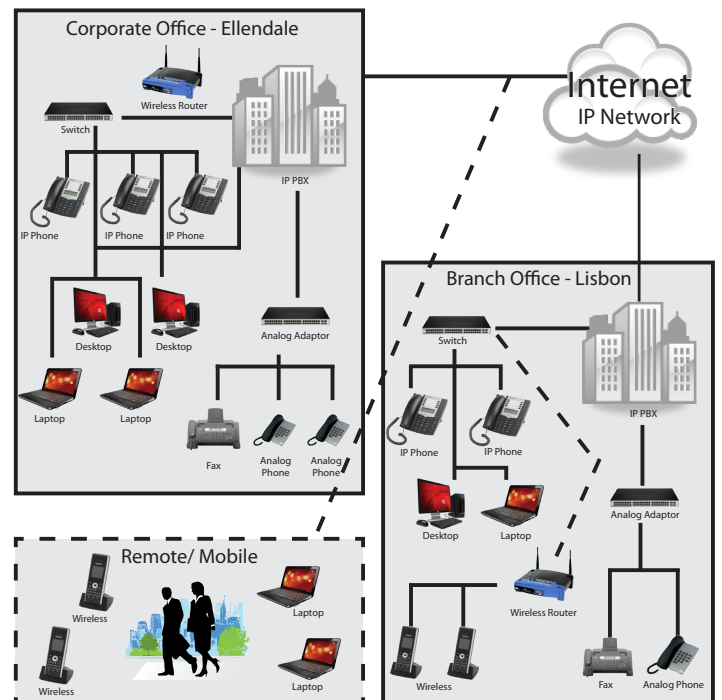

Eliminate the need for costly activations or moves that involve separate service technicians from each manufacturer. Savings are immediate when you upgrade to DRN's IP telephone system. Web-based tools allow for more efficient moves, adds, and changes. Simply unplug from the data network and plug it back in at the new location to relocate any IP telephone. Services are instantly restored by DRN along with every feature and grouping previously assigned. Throw away outdated PBX or key systems in small remote office locations and access advanced communication applications such as Call Managing, Unified Messaging, Fine Me/Follow Me, among others, can be seamlessly distributed over IP networks to all remote and mobile locations.

Work from any location as if you were still at your desk

IP Centrex is a highly scalable system/service that is personalized to your individual budget, networking, and business needs. As your business grows you can add new sites to your network as well as increase access speeds between sites by simply upgrading your package. Let DRN take care of the rest. We will handle ongoing maintenance and upgrades to outdated equipment. This is great for remote employees because it enables them to securely access the network from out-of-office locations with out being inconvenienced.

Focus on the core of your business

Avoid the cost of building, maintaining, and managing your phone system. DRN's IP Centrex allows you to focus on the day-to-day tasks of owning and operating a successful business. There is no one size fits all. This fully customizable system offer flexibility to personalize it to your individual needs and wants. Features such as Unified Messaging and Call Manager increase productivity by improving communication and collaboration among employees. DRN's IP Centrex offers a single source for all your telecommunication needs. With our IP Centrex we take accountability for all response and restore situations.

6800 Series SIP Phones

The CommPortal interface:

- Enables customization of calling features, access to contacts, missed calls and visual voicemail
- See a record of all your calls – incoming, outgoing and missed calls, as well as the call time, date, and length
- Available to a broad range of mobile platforms and devices.
- Designed to be fully customizable - can be set up and managed from any computer
- Includes a wide range of features: click-to-dial, call forwarding, voicemail player, Visual voicemail
- Create a Contact list with the ability to store multiple phone numbers, e-mail addresses and other detailed contact information
- User friendly Dashboard that promotes personalization and retention

Auto-Attendant

An automatic computerized process that directs incoming calls to the appropriate person.

- Design and Configure using CommPortal
- Automatic Call-Answering
- Customize a menu of different options that a caller may select with the press of a button

Example:

Press 1: To place an order.
Press 2: To hear the store hours
Press 3: To speak to a customer service representative

An Automated receptionist customized to meet the specific needs of each business, while projecting a professional image.

Accession Communicator - For Mobile

Accession Communicator Mobile makes all the rich functionality of your Centrex phone available to you anywhere, anytime, via your smartphone or tablet.

- **Call from anywhere.** Make and receive calls on your mobile as though you were at your office.
- **Choose who sees your mobile number.** With single number convenience, the person you call will see your Centrex phone number instead of your mobile number.
- **Receive calls on any device.** When someone calls your primary number, the call will appear on the device that you've set up. This can include desk phone, mobile phone, and tablet. You answer the call on whichever device is most convenient for you.
- **Save your mobile minutes.** Start a call on wi-fi, switch it to cellular if you move out of wi-fi coverage.
- **Control incoming calls.** Accession allows you to determine how you can be, or want to be, reached at anytime.
